"Growing to Serve the Community"

As I reflect on 2022 and reaching 51 years of serving the community, I am filled with gratitude for the continuous support from our donors. Our GROWTH is a direct result of the generous donations from individuals, large foundations, and corporations.

In recognizing our donors, we created the Friends of the Free Clinic list. This list showcases various levels of donations received each year. What is so amazing about this list is that so many of the names are repeated year after year. This is what keeps our doors open.

What we have learned is that support from community members is the driving force for larger contributions from foundations and corporations. In 2022, we were so fortunate to receive large donations from several first-time donors. These new donors support us because of the huge amount of ongoing community support we receive.

I recently gave a tour to a group of women from a local church. This group of community-minded women makes a small financial contribution to the Clinic once a year. I told them how much I appreciated their support, because it opens doors and leads to more contributions.

The Free Clinic of Simi Valley offers medical, dental, ophthalmology, counseling, and legal services to those in need. For many of our clients, the Clinic is their lifeline. We appreciate your support at whatever level because it often leads to greater support down the road.

We are "Growing to Serve the Community." Thank you, DONORS, for making our "GROWTH" possible.

"Growing to Serve the Community"

In 2022, it was a year of growth for the Free Clinic of Simi Valley. We celebrated 51 years and marked the occasion by honoring and acknowledging our many donors, whose commitment has played a vital role in the continued success and growth of the Free Clinic.

Some key highlights for the year included – the unveiling of the beautiful and vividly colored Donor Wall in the lobby of the Clinic, a new partnership with the West Los Angeles College Dental Hygiene Program, completion of Phase Two of the Donor Plaza, distribution of COVID-19 vaccinations, and the 5th Annual Fredrick Michael Gibson 5K/10K Run and Half Marathon for Depression Awareness.

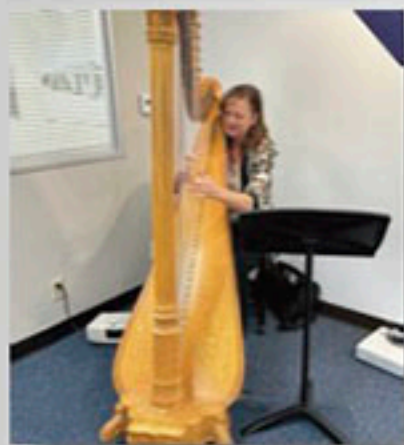

For the first time since the pandemic, the Clinic resumed children's vaccinations and in-person counseling sessions. There were approximately 8,360 (total visits) people served by clinic services, which included medical, dental, ophthalmology, counseling, and legal services.

The Free Clinic of Simi Valley – "Growing to Serve the Community."

Donor Recognition Reception

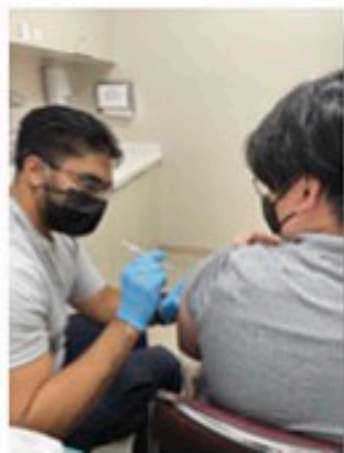

In November 2022, the Free Clinic held a Donor Recognition Reception. It was an opportunity for donors to tour the Free Clinic and engage with staff and board members. The evening included a welcome and thank you by Free Clinic Board President Vince Dulcich and comments from Executive Director Fred Bauermeister. Donors were treated to light refreshments and live entertainment.

COVID-19

Booster Vaccines

In addition to serving as a testing site for COVID-19, the Free Clinic was tapped by the State of California to administer a limited number of COVID-19 vaccinations. A total of 38 boosters were given out to community members.

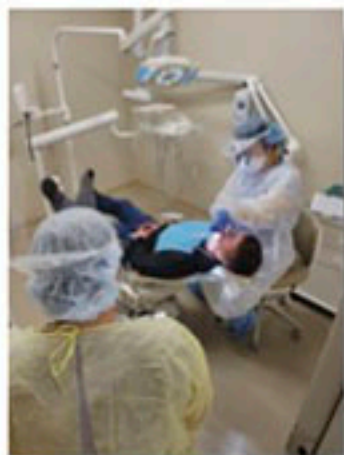

For the Need Foundation Ribbon Cutting Ceremony

Congratulations to For the Need Foundation. In March, they held an official Ribbon Cutting Ceremony with supporters and local dignitaries on hand for the celebration. For the Need Foundation is one of seven nonprofit agencies housed in the Multi Services Center wing of the Free Clinic.

For the Need Foundation was founded in 2004 and delivers hope and resources to youth experiencing poverty, homelessness and abuse.

New Partnership with West Los Angeles College Dental Hygiene Program

In 2022, the Free Clinic established a partnership with West Los Angeles College Dental Hygiene Program. This collaboration was formed to expand the Clinic's dental program to include preventive dental health-care. Under the supervision of a professor from the college, students receive training at the Clinic, working on dental patients.

5th Annual Fredrick Michael Gibson 5K/10K Run and Half Marathon for Depression Awareness

Some 400 runners came together to run for a cause in the 5th Annual Fredrick Michael Gibson 5K/10K Run and Half Marathon for Depression Awareness. This event is a favorite for running enthusiasts across

counties, and it was the first year a half marathon was included. Runners enjoyed a course that ranged from flat to fast to scenic. The Simi Valley Family YMCA's Y's Men were back serving up a pancake breakfast for runners at the finish line. All proceeds from the event benefited the Free Clinic's Counseling Program.

Ambulatory Care Pharmacists' Graduation

Since 2007, the Free Clinic has served as a training site for the certification of Ambulatory Care Pharmacists. An informal graduation was held last year at the Free Clinic for pharmacists completing the program. Dr. Mitch Pelter, Pharm. D, presided over the ceremony, presenting certificates to the graduating class. In the photo are members of the graduating class – (from left to right) Shawn Lu, Erika Generoso, Christina Lee, and Tiffany Ly Dang. The Free Clinic is honored to offer this training for future pharmacists and grateful for their volunteer service.

Passing the Hammer

The Clinic extended a thank you to Dr. Kar (left) for serving as Attending Physician. As is the tradition outgoing Attending Physician Dr. Kar "passed the hammer" to incoming Attending Physician Dr. Wolfish (right). In this role, Dr. Wolfish will supervise third-year students from the Kaiser Permanente Woodland Hills Family Practice Residency Program. The Clinic has served

as a training facility for resident physicians for 15 years.
